EDUCATION

GEORGE MASON UNIVERSITY - College of Engineering & Computing

Expected – May 2026

B.S. in Information Technology - Cybersecurity

Dean's List 2024, 2025

Relevant Coursework: Python Programming, Intro To Engineering, Java Programming, Computer Programming, Intro to Electrical/Computer Engineering, C Programming For Engineers, Linux System Admin, Telecommunications, Computer Hardware Troubleshooting, Microcomputer OS, PC & OS Architecture.

CAREER

DEPARTMENT OF STATE

Fairfax, VA

DevOps Engineer Intern

May 2024 – Aug 2024

- Engineered and deployed an information-oriented mobile application for U.S. expatriates in Turkey, leveraging PowerApps and Azure SQL databases, which streamlined access to critical resources for an estimated 200 users and reduced inquiry calls by 20%.
- Proactively managed and maintained complex Cisco networking systems, Linux servers, and encrypted radio communications across multiple embassy departments, ensuring 100% system uptime and secure operations for 3 critical services.
- Enhanced IT infrastructure and network security by conducting systematic maintenance and debugging software across core systems, utilizing Docker, Kubernetes, virtual machines, and batch scripting, resulting in a reduction in reported vulnerabilities and improvement in operational efficiency.

CONTINUUM BEHAVIORAL HEALTH

Fairfax, VA

Registered Behavioral Technician

Oct 2024 – Present

- Leveraged specialized behavioral tracking software to meticulously log patient progress and conduct in-depth analysis of therapy outcomes, informing 50+ individualized treatment plans and contributing to a 25% improvement on average in patient goal behaviors attainment over clientele.
- Ensured meticulous data collection and reporting for therapy sessions, maintaining adherence to HIPAA compliant record-keeping standards and supporting clinical audits without discrepancies.
- Consistently implemented individualized Applied Behavior Analysis (ABA) treatment plans across 20 client cases, employing evidence-based strategies such as DTT, NET to facilitate skill acquisition and achieve mastery of target behaviors, significantly enhancing client independence and functional communication.

PROJECTS

MISSION TURKIYE GUIDE

2024

- Developed and launched an interactive mobile guide for U.S. expatriate diplomats in Turkey, addressing the need for immediate access to critical local information. My actions involved designing comprehensive directories for emergency services, embassies, and recommended local businesses, which provided essential, easily searchable resources for an estimated 200 users.
- Integrated Microsoft PowerApps with Azure SQL databases to establish a robust backend, enabling real-time cloud storage and dynamic data retrieval for critical information and resources.
- Engineered the UI/UX interface with a focus on accessibility and efficiency. Through iterative design and user feedback incorporation, I facilitated seamless search and navigation functionalities, enhancing user experience and increasing daily active users.

CHESS-CLI

2025

- Engineered a Command Line Interface Chess application for Unix-like operating systems using Java, to provide a robust and accurate gameplay experience. I implemented a comprehensive game state management system alongside real-time board rendering and precise piece movement validation.
- Developed a multi-level Artificial Intelligence (AI) for the Chess-CLI App, to offer varied challenges for players of all skill levels. My actions included employing algorithmic strategies ranging from a basic move generator to a sophisticated minimax algorithm, which enabled 3 distinct difficulty settings and provided an engaging, strategically deep opponent for users.
- Architected a modular and extensible codebase for the Chess-CLI App, with the goal of ensuring long-term maintainability and future scalability. This involved adhering rigorously to object-oriented programming principles and design patterns, which reduced the estimated time for future feature integration and enhanced code reusability across the project.

SKILLS

Technical: Proficient in Java, Python, C, C++, SQL, Wireshark, TypeScript, JavaScript, CSS, bash, R, SQL, Excel, Microsoft Word, Git, Microsoft Azure, Tailwind CSS, VSCode, KVM, Windows, MacOS, Linux, RedHat.

Strengths: collaborative, dedicated, fast-learner, tech-savvy, adaptable, communicative.
