

EDUCATION

GEORGE MASON UNIVERSITY - College of Engineering & Computing

B.S. in **Information Technology**

Concentration in **AI Driven Solutions**

Relevant Coursework : Python Programming, Intro To Engineering, Java Programming, Computer Programming, Intro to Electrical/Computer Engineering, C Programming For Engineers, Linux System Admin, Telecommunications, Computer Hardware Troubleshooting, Microcomputer OS, PC & OS Architecture.

Expected – May 2026

Dean's List 2024, 2025

CAREER

OUTAMATION

Machine Learning Engineer Intern

Fairfax, VA

July 2025 – Aug 2025

- Strengthened document processing efficiency by classifying and extracting critical data from unstructured mortgage documents using Python and AI models, including salaries, dates, and account numbers.
- Tested and evaluated AI models including DocLLM, LangChain, and LayoutLM for document classification and data extraction, Analyzing performance to identify optimal tools for mortgage industry applications.
- Recommended actionable insights for optimizing document processing workflows, leveraging benchmarked AI tools to enhance data accuracy and operational efficiency.

DEPARTMENT OF STATE

Software Engineering Intern

Fairfax, VA

May 2024 – Aug 2024

- Deployed an information-oriented mobile applications backend for U.S. expatriates in Turkey with Azure SQL and NodeJS, streamlining access to critical resources for ~200 users and reduced inquiry calls by 20%.
- Automated IT network security protocols through PowerShell scripting, systematically debugging software and conducting maintenance, which reduced reported vulnerabilities by 30%.
- Managed and maintained Cisco networking systems and Linux servers across embassy departments, ensuring 100% system uptime and secure operations for 3 critical services.

PROJECTS

AI DATA PROCESSING RAG PIPELINE

2025

- Engineered a RAG pipeline to enhance LLM accuracy; developed a data ingestion pipeline to chunk and embed over 1,000 documents, reducing model hallucination by 25%.
- Optimized retrieval for a RAG pipeline by implementing hybrid search and re-ranking algorithms, which decreased query latency by 40%.
- Managed performance and maintenance of a RAG pipeline by creating a continuous evaluation framework, ensuring long-term reliability by proactively addressing data drift.

MISSION TURKIYE GUIDE

2024

- Developed an interactive mobile guide for U.S. expatriate diplomats in Turkey, providing 200 users with immediate access to critical local information, including emergency services, embassies, and local businesses.
- Integrated Azure SQL databases to establish a robust backend, enabling real-time cloud storage and dynamic data retrieval for critical information and resources.
- designed UI/UX interface with a focus on accessibility and efficiency. Through iterative design and user feedback incorporation, facilitated seamless search and navigation functionalities, enhancing user experience.

LEADERSHIP & ACTIVITIES

Coding Club (Vice-President)

2022-Present

- Organized weekly coding club meetings, fostering an easy environment for developing programming skills.

Chess Club (Mentor)

2022-Present

- Competed in and helped organize inter-club chess tournaments, improving strategic thinking.

SKILLS

Languages: Java, Python, C, C++, TypeScript, Bash, SQL.

Technical: Wireshark, Git, MS Azure, MS Excel, MS Word, KVM, Kubernetes, Cameo, Jira , RedHat.

Soft Skills: collaborative, dedicated, fast-learner, tech-savvy, adaptable, communicative.
